

# Zusi 3

## Aerosoft Edition

Experience a train driver's operations at the highest level of realism. This professional version is currently being used by railway companies for engine driver training. It features faithful track recreations, authentic and physically correct driving and braking behaviour, prototypical and fully functional signalling, realistic timetables, and various variants of the train protection systems PZB and LZB.

Zusi 3 comes with 10 routes from different eras, covering 500 kilometres of track for the virtual train driver to explore.

Additional routes, vehicles, timetables, and more are already available. The included editors, can be used to create your own additional expansions for Zusi and share them with the community.

### Features:

- Drive in the route network following pre-defined timetables. Hundreds of trains can operate together by use of the timetable, with the autopilot controlling all other trains
- Preview of every train with overview of timetable and vehicles
- Vehicles controllable with keyboard and mouse or the Raildriver Cab Controller
- Assistance for beginners: adjustable level of realism
- True-to-original driving and braking dynamics
- Various Sifa systems are simulated in detail
- Various door protection systems
- Original surround sound
- True-to-original signalling. All German signal systems are included
- Exact, true-to-original track routing
- Tracks are built in modules that can be merged to larger networks within the timetable scenario
- Included editors to build your own timetable scenarios, vehicles, tracks, etc.
- Interfaces for geo data to build realistic and precise tracks
